

# Geevarghese Regi

+91 8113029191    geevargheseregi78@gmail.com     [karivarkey.me](https://karivarkey.me)     [karivarkey](https://karivarkey.com)     [LinkedIn](https://www.linkedin.com/in/geevarghese-regi)

## HIGHLIGHT OF SKILLS

- 2+ years of hands on experience in full-stack software development (React Native, Firebase, PostgreSQL, Supabase, Docker, Node.js).
- Published papers in the intersection of systems and sustainability, including energy efficiency of CPUs and global warming impact.
- Strong understanding of systems programming especially Linux Environment.
- Active participant in hackathons and community initiatives.
- Delivered technical workshops and mentored peers on MERN stack, JWT auth, deployment strategies and AI
- Adept at bridging theory and practice – combining academic curiosity with pragmatic engineering to build impactful tools and systems.

## EDUCATION

|                         |                                                                                                                     |                                                |
|-------------------------|---------------------------------------------------------------------------------------------------------------------|------------------------------------------------|
| 2022-2026<br>(expected) | <b>B.TECH IN COMPUTER SCIENCE &amp; ENGINEERING</b><br>Rajagiri School of Engineering and Technology, Kerala, India | <b>8.3 /10 CGPA</b><br><b>(Semester 6)</b>     |
| 2020-2022               | <b>AISSE (ALL INDIA SECONDARY SCHOOL EXAMINATION)</b><br>St Peter's Senior Secondary School , Kadayiruppu, India    | <b>CLASS X - 91%</b><br><b>CLASS XII - 91%</b> |

## WORK EXPERIENCE

|                |                                                                                                                                                                                                                                                                                                                                                      |
|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Jun - Sep 2024 | <b>FRONT END INTERN   MULEARN FOUNDATION, TRIVANDRUM [REMOTE]</b> <ul style="list-style-type: none"><li>• Resolved critical bugs and contributed to app.mulearn.org, used by 10,000+ users.</li><li>• Worked on building µShelf</li></ul>                                                                                                            |
| Oct - Dec 2024 | <b>TECHNICAL INTERN   BANZAN STUDIOS, KOCHI [HYBRID]</b> <ul style="list-style-type: none"><li>• Fully redesigned legacy website from scratch using React and TailwindCSS.</li><li>• Architected a content-driven site using dynamic configs for rapid customization.</li><li>• Worked on an internal product "Snackr" using React Native.</li></ul> |
| Dec 2024 - Now | <b>FREELANCER   AIDEDHS , CANADA [REMOTE]</b> <ul style="list-style-type: none"><li>• Owning the entire tech stack for healthcare startup: mobile app, backend, infra.</li><li>• Built scalable APIs using Bun + ElysiaJS, deployed via Google Cloud Run.</li><li>• Integrated Supabase + PostgreSQL with secure auth and modular schemas.</li></ul> |

## PUBLICATIONS

### Peer-Reviewed Journal Articles

- Regi, G., Kunnappally, J. J., & Yunus, R. (2025). Comparative Analysis of Energy Efficiency Between ARM and x86 Architectures in Mobile Devices and Its Implications for Human-Computer Interaction. Kristu Jayanti Journal of Computational Sciences (KJCS), 4(1), 54–67. <https://doi.org/10.59176/kjcs.v4i1.2434>
  - First author; originated research idea, conducted architectural analysis, benchmarked energy usage, and created comparative charts.

### Other Articles / Microjournals

- Regi, G. (2023). From Cigars to CPUs: An Analysis of Efficiency and Global Warming. CONEXUS, Volume 2, Rajagiri School of Engineering & Technology.

## PROJECTS

### **RSET Labs – Physics Lab Record System**

- Digitized lab record keeping for RSET.
- In use by 1000+ students
- Technologies used : React , Tailwind, Firebase, GCP

### **Kodomo – AI-Powered EdTech (Showcase)**

- *A webapp created to help students learn concepts via memes.*
- *Dynamically generates memes based on questions and content of the conversation*
- *Technologies used : React, Flibase, Gemini AI*

### **Custom ROM Builder for Realme 6/6i/6s**

- *Worked as a community developer to build and maintain custom ROMs for a community of 2500 members*
- *Built and maintained (MSM Xtended , Bliss OS)*
- *Technologies used : GCP , Java and C cross-compilation tools and libraries*

## AWARDS AND HONORS

- Young Innovators Program (YIP) 5.0 – State Level Winner
- Winner of multiple state level ideathons focused on tech-for-good, sustainability, and innovation.
- Secured top positions in national and state-level hackathons, competing across interdisciplinary domains (AI, healthcare, education).

## COMMUNITY INVOLVEMENT

- Tink-her-Hack – **Mentor**
- IEEE Game Jam – **Mentor & Judge**
- Global Game Jam 2025 – **Organizer & Host (Kochi)**
- Part of School and College Senate and various clubs (**CSI, TinkerHub**)
